Number of buildings:			
Auditors should count all buildings that are part of the facility, whether inmates are formally allowed to enter them or not. In situations where temporary structures have been erected (e.g., tents) the auditor should use their discretion to determine whether to include the structure in the overall count of buildings. As a general rule, if a temporary structure is regularly or routinely used to hold or house inmates, or if the temporary structure is used to house or support operational functions for more than a short period of time (e.g., an emergency situation), it should be included in the overall count of buildings.	2		
Number of inmate housing units:			
Enter 0 if the facility does not have discrete housing units. DOJ PREA Working Group FAQ on the definition of a housing unit: How is a "housing unit" defined for the purposes of the PREA Standards? The question has been raised in particular as it relates to facilities that have adjacent or interconnected units. The most common concept of a housing unit is architectural. The generally agreed-upon definition is a space that is enclosed by physical barriers accessed through one or more doors of various types, including commercial-grade swing doors, steel sliding doors, interlocking sally port doors, etc. In addition to the primary entrance and exit, additional doors are often included to meet life safety codes. The unit contains sleeping space, sanitary facilities (including toilets, lavatories, and showers), and a dayroom or leisure space in differing configurations. Many facilities are designed with modules or pods clustered around a control room. This multiple-pod design provides the facility with certain staff efficiencies and economies of scale. At the same time, the design affords the flexibility to separately house inmates of differing security levels, or who are grouped by some other operational or service scheme. Generally, the control room is enclosed by security glass, and in some cases, this allows inmates to see into neighboring pods. However, observation from one unit to another is usually limited by angled site lines. In some cases, the facility has prevented this entirely by installing one-way glass. Both the architectural design and functional use of these multiple pods indicate that they are managed as distinct housing units.	10

Audit Findings

Audit Narrative (including Audit Methodology)

Pre-Onsite Audit Phase

Audit Planning and Logistics:

I had the opportunity to discuss the audit process and expectations of both parties with Warden Hileman. We coordinated the dates for the onsite audit at the facility. During these conversations we outlined an overall audit schedule and I notified the facility of the estimated time of arrival onsite.

Posting Notice of the Audit:

I forwarded the audit posting to the facility on June 24, 2020. The posting included the dates of the audit, purpose of the audit, my contact information and a statement regarding the confidentiality of any communication received. The postings were placed throughout the facility, including all housing units, visiting areas, recreational areas and all common areas. I verified the placement of the audit notices during the facility tour, and inmate and staff interviews. I did not receive any letters from inmates, nor staff.

Review of Agency and Facility Policies, Procedures and Supporting Documentation:

The facility provided me a flash drive containing all policies and procedures related to the Prison Rape Elimination Act, as well as documentation that all policies and procedures were practiced on a daily basis. They also provided me a completed PRE-Audit Questionnaire. The policies, procedures, and documents reviewed during this phase of the audit are listed under Onsite Audit, with all documentation reviewed during the course of the audit.

Outreach to Community Advocacy Organizations:

I contacted Survivor Inc. who provides victim advocacy. They knew of no issues at the facility.

Onsite Audit Phase

Site Review:

The audit was conducted during the Covid 19 Pandemic. The Agency and Auditor took all necessary precautions outlined by the Adams County Correctional Complex. These precautions included temperature check prior to entering the facility, universal masking for all staff, and visitors. During the facility tour social distancing was practiced. The staff and inmate interviews were conducted with the participants seated at minimum of 6 feet apart, and both wearing masks.

The Warden, PREA Coordinator, and I met on August 17, 2020 at approximately 8:00 a.m. to conduct a briefing and facility tour. We discussed the onsite portion of the audit, including facility tour, inmate and staff interview location, and document review. During the tour I had the opportunity to view all areas of the facility. I interacted with both staff and inmates, as well as observed the interaction between the staff and inmates. I was able to verify the location of cameras throughout the facility, as well as the camera monitor locations. While on the housing units I observed the related PREA information, Audit Posting, and applicable policies and procedures posted in the common areas, which are accessible to all inmates. These postings were further observed in common areas throughout the facility. While conducting the tour I reviewed log books on the housing units.

The inmate interviews began immediately following the facility tour. They were conducted in various locations throughout the facility. These areas provided privacy for the interviews. The inmates were randomly selected from inmates on the housing units. During this process I interviewed inmates in the following categories:

Interview Type	Number
Random Inmate Interviews	11
Youthful Inmates	1
Inmates with a Physical Disability	2
Inmates who are Blind, Deaf, or Hard of	
Hearing	1
Inmates who are Limited English Proficient	0

Inmates in Segregated Housing for High Risk of	0
Sexual Victimization	
Inmates who Reported Sexual Abuse	0
Inmates who Reported Sexual Victimization	
During Risk Screening	4
Total Inmate Interviews	25

During the interview process several targeted categories of inmates were not being housed at the facility. I conducted the interviews with all inmates in the same manner, a preamble to the interview was related to the inmate explaining the purpose of the interview, and how they were selected and explaining to them that they did not have to speak with me if they choose not to. No inmates refused to speak with me. All inmates were asked questions related to the Random Inmate Interviews, and if they were in a targeted category, I asked those additional questions. During the interviews I utilized a written PREA materials to visually stimulate the inmate's recollection of their initial intake process and screening.

The staff interviews were conducted in various areas on both days of the audit. Interviews were conducted on all shifts. During the process I interviewed staff in the following categories:

Interview Type	Number
Random Staff Interviews	10
Intermediate or Higher-Level Staff Conducting	
Unannounced Rounds and Intake Staff	3

Staff who Supervise Inmates in Segregated	
Housing	1
Staff on the Sexual Abuse Incident Review	
Team	1
First Responders	3

PREA Coordinator	1
Warden	1
Total Staff Interviews	31

I conducted the interviews with all staff in the same manner, a preamble to the interview was related to the staff member explaining the purpose of the interview, and how they were selected and explaining to them that they did not have to speak with me if they choose not to. No staff refused to speak with me. All interviewed staff was asked questions related to the Random Staff Interviews, and if they were in a targeted category, they were then asked questions pertaining to that area. During the interviews I utilized documentation related to a specific targeted interview and random interviews. These items were used to visually stimulate the staff's recollection on the daily practices at the facility.

The onsite documentation review was conducted during all days of the audit process. The onsite documentation was reviewed at the source, all files, and facility documents were retrieved by me. The following is a list of documentation reviewed during the Pre-Audit, Onsite Audit and Post Audit Phases, with the applicable standard to each.

At the conclusion of the Onsite Audit an exit conference was held with the administration. At this time, I provided an overview of the audit findings during the onsite audit portion.

During the staff interviews I found that the staff took ownership not only of the immediate areas they worked in, but the facility overall. This staff attitude helps in creating the respectful culture at the facility. This was further confirmed by the interviewed inmates who related that they are treated with respect by the staff.

Post Audit:

Upon completion of the Pre-Audit and Onsite Audit phases I conducted a systematic evidence review of all of the information obtained during the audit process. I utilized the Compliance Tool as a guide to ensure that all aspects of each standard were met. This assurance was made by a triangulation of the policies and documentation reviewed, my personal observations during the onsite audit, and through the information received during the interviews. After taking all of these factors into account I found that the facility has met all of the standards and are in compliance with the Prison Rape Elimination Act National Standards for Prisons and Jails.

Facility Characteristics

The ACACC is located at 45 Major Bell Lane; Gettysburg, PA 17325. The facility is located on the property owned by Adams County, this property is utilized for several county agencies. The following mission statement is posted on the facility website:

The mission of the Adams County Adult Correctional Complex (ACACC) is to protect and serve the residents of Adams County and the general public by providing progressive and comprehensive correctional and rehabilitative services. These functions are achieved through programs, and highly accountable security methods. We will strive to empower our workforce at every level to achieve excellence in correctional practices. Collaboration, efficiency, accountability, integrity, and leadership are keys to our success.

The facility is located within two buildings, one building is utilized for the main jail, and the second is utilized for work release. The main building of the facility is accessed through a secure door that is controlled by two officers working in the main lobby area. All visitors to the facility must pass through a metal detector and clear the detector before entry is allowed. The main lobby area is utilized for all visitors, the staff enters the facility through a separate entrance. The administrative offices are located off of the lobby area, these offices are also accessed through a secure door. The offices of the Classification Specialist and Treatment Specialists are also located off the main lobby in a separate area.

The interior areas of the facility are located off of a main hallway. The main control is located in the hallway allowing the officers a view of inmate movement within the facility. The facility has three single cell housing units, three multiple occupancy housing units and four dormitory style housing units. Two of the dormitory style housing units are in the work release building.

The cells are constructed with a single window, the toilets in the cells are angled allowing the inmates the privacy needed while performing bodily functions. All of the showers on these housing units have doors and or curtains that allow privacy while showering. It is the policy of the facility that the only area an inmate is allowed to be completely unclothed is in the shower.

The dormitory housing units have separate toilet and shower areas. The toilet stalls all have operational doors, and the showers have curtains.

As described the work release center is located in a second building. The building is controlled by a locked door, upon entering the building the officer's station is located in the lobby area. The building houses two separate dormitory style housing units, one for females, and one for males. These units are separated by the lobby area, the entrances to the housing units are locked at all times. As in the main jail building, female, and male officers are on duty in the work release center at all times. The bathrooms and shower areas are equipped with stall doors and shower curtains, to provide adequate privacy when performing bodily functions or showering.

The aforementioned main hallway contains all of the main portions of the facility, kitchen, group rooms, medical, housing units, and recreation areas.

The intake area of the facility has cells that are utilized for the temporary housing of inmates upon entering and exiting the facility.

The facility provides medical services onsite, these services are provided by Prime Care Medical.

The food service at the facility is provided by Trinity Food Service, all of the meals are provided to the inmates on their housing units.

Cameras are located throughout the facility, with the main monitors in the security control. During my tour of the facility I found that information on the Prison Rape Elimination Act, and reporting avenues are located throughout the facility.

I found that administrative staff, as well as general staff moves throughout the facility frequently, this movement of staff deters any violation of the PREA policy, and more importantly provides an overall safe environment for both inmates and staff.

During the audit the facility was under Covid 19 precautions. No volunteers were coming into the facility. Work release was also temporarily suspended.

Summary of Audit Findings

The summary should include the number and list of standards exceeded, number of standards met, and number and list of standards not met.

Auditor Note: No standard should be found to be "Not Applicable" or "NA". A compliance determination must be made for each standard.

EVIDENCE OF COMPLIANCE:		

The Adams County Adult Correctional Complex Policy and Procedure Manual Policy Number: 100-26 Prison Rape Elimination Act outlines the agency's mandated zero tolerance toward all forms of sexual

abuse and sexual harassment and further outlines the agency's approach to preventing, detecting, and responding to such conduct. This policy furthermore defines all sexual abuse and sexual harassment.

I reviewed the policy in its entirety, as well as questioned staff members on its content and applicable sections to their specific duties within the facility. The staff understood the policy and its practical application to the daily operation of the facility.

The agency has designated a PREA Coordinator. During the interview he related that he has sufficient time and authority to develop, implement, and oversee agency efforts to comply with the PREA standards. I found the PREA Coordinator to be well versed in the PREA Standards, and their daily application. Interviewed staff stated that the PREA Coordinator is always available to answer questions and provide advice on the implementation of the PREA policies. During the onsite portion of the audit I found the PREA Coordinator as well as all other staff dedicated to the prevention of sexual abuse and sexual harassment in the facility. The prevention of incidents of this nature is evident by the minimal amount of PREA allegations at the facility.

The PREA Coordinator is a Deputy Warden, he reports directly to the Warden. He has the ability to bring any PREA related concerns directly to her.

Prior to the onsite audit all documentation was reviewed, during the onsite portion I observed the policies in daily practice, and this was further confirmed during my interviews with both staff and inmates.

After a careful review of all documentation, and the information received during interviews, I found that the agency has substantially exceeded the requirements of this standard, and all provisions. This decision was based on the agency's overall commitment to sexual safety in their facility.

		Meets Standard (Substantial compliance; complies in all material ways with the standard for the relevant review period)		

EVIDENCE OF COMPLIANCE:

The agency has developed a facility staffing plan that provides for adequate levels of staffing, and, where applicable, video monitoring, to protect inmates against sexual abuse. In calculating adequate staffing levels and determining the need for video monitoring, facilities have taken into consideration all areas enumerated under this standard. Compliance was determined by reviewing the aforementioned policies. I further questioned staff on the policies and the ability to fully staff the facility at all times. I was informed that the facility will fill posts with overtime if needed to be at full compliment. The facility staffing plan is predicated on PA Code 37 which states the minimum required custody ratio is one officer per shift for fifteen inmates.

Does Not Meet Standard (Requires Corrective Action)

The staffing at the facility is reviewed yearly by the administration. This was confirmed through interviews and reviewing the staffing analysis for 2019. I also reviewed documentation of staffing analysis from previous years to ensure the yearly review is consistent.

During the interviews with the administration at the facility I confirmed a daily review of the staffing at the facility. The administration meets on a regular basis. During this meeting the overall facility operations are discussed to include staffing.

The staffing plan has not been deviated from within the last 12 months. I confirmed during staff interviews that any posts would be filled with overtime if needed, and they have the ability to collapse other posts if need be. This was evident during the audit, the lobby officers were not needed full time due to the restricted access to the facility. They had the ability to utilize these officers elsewhere.

The administration meets on a regular basis to review incidents that have occurred at the facility, as well as discussing normal facility operation. During these meetings, they discuss any adjustments that may need to be made to the staffing plan, deployment of video monitoring and other technologies, and any resources available. This was confirmed during the staff interviews.

The agency has implemented a policy and practice of having intermediate-level or higher-level supervisors conduct and document unannounced rounds to identify and deter staff sexual abuse and sexual harassment. These unannounced rounds take place during all shifts at the facility. The agency has a policy prohibiting staff from alerting other staff members that these supervisory rounds are

occurring. I further confirmed the rounds are occurring during the staff and inmate interviews as well as reviewing the logs generated by the housing unit officers.
During the onsite audit I reviewed the officer logs confirming the documentation of the unannounced rounds.
After a careful review of all documentation, and the information received during interviews, I found that the agency is substantially compliant with the requirements of this standard, and all provisions.

EVIDENCE OF COMPLIANCE:

Auditor Overall Compliance Determination

The facility does not conduct cross-gender strip searches or cross-gender visual body cavity searches unless in exigent circumstances or when performed by a medical practitioner. I confirmed this procedure during staff and inmate interviews, as well as review of policy. I also confirmed that the facility has not conducted a search under these circumstances.

The facility does not limit female movement if female staff is unavailable to search them. During staff interviews I confirmed that female staff are always present, this is part of the staffing requirements.

The above policies outline procedures and practices that enable inmates to shower, perform bodily functions, and change clothing without nonmedical staff of the opposite gender viewing their breasts, buttocks, or genitalia, except in exigent circumstances or when such viewing is incidental to routine cell checks. The policies further dictate that staff of the opposite gender announces their presence when entering an inmate housing unit. These practices were confirmed during the staff and inmate interviews as well as during the facility tour when I observed the announcements taking place. The bathrooms in the housing units are constructed to provide privacy while performing bodily functions and showering. They have either curtains or doors to provide this privacy.

The facility does not search or physically examine a transgender or intersex inmate for the sole purpose of determining the inmate's genital status. If the inmate's genital status is unknown, it is determined during conversations with the inmate, by reviewing medical records, or, if necessary, by learning that information as part of a broader medical examination conducted in private by a medical practitioner. I further confirmed the practices during the staff and medical interviews.

The agency has trained security staff in how to conduct cross-gender pat-down searches, and searches of transgender and intersex inmates, in a professional and respectful manner, and in the least intrusive manner possible, consistent with security needs. This was confirmed during staff interviews and reviewing the provided training materials.

After a careful review of all documentation, and the information received during interviews, I found that the agency is substantially compliant with the requirements of this standard, and all provisions.

EVIDENCE OF COMPLIANCE:

The agency has taken appropriate steps to ensure that inmates with disabilities (including, for example, inmates who are deaf or hard of hearing, those who are blind or have low vision, or those who have intellectual, psychiatric, or speech disabilities), have an equal opportunity to participate in or benefit from all aspects of the agency's efforts to prevent, detect, and respond to sexual abuse and sexual harassment. These steps include, when necessary to ensure effective communication with inmates who are deaf or hard of hearing, providing access to interpreters who can interpret effectively, accurately, and impartially, both receptively and expressively, using any necessary specialized vocabulary. In addition, the agency shall ensure that written materials are provided in formats or through methods that ensure effective communication with inmates with disabilities, including inmates who have intellectual disabilities, limited reading skills, or who are blind or have low vision. The facility outlines the response to inmates in these categories in the above listed policies. The policies outline procedures for inmates who are not only non-English speaking, but all who are enumerated in this standard. I confirmed the use of this procedure during the staff and inmate interviews.

The agency has taken steps to ensure meaningful access to all aspects of the agency's efforts to prevent, detect, and respond to sexual abuse and sexual harassment to inmates who are limited English proficient. The agency would utilize a language line for interpretation purposes. The treatment staff further confirmed that they meet with the inmates on their caseloads and would further provide education if needed.

The agency does not rely on inmate interpreters, inmate readers, or other types of inmate assistants. The interviewed agency investigator is aware of the approved interpreters and confirmed during

investigations they would utilize these services. The criminal investigations are conducted by the Pennsylvania State Police, they have their own contracted interpretation services they would utilize.

During the inmate interviews I interviewed inmates with Cognitive Disabilities and one inmate hard of hearing. All of these inmates related that the staff further explained the sexual abuse and sexual harassment policies, and ensured that the inmates understood the reporting avenues.

After a careful review of all documentation, and the information received during interviews, I found that the agency is substantially compliant with the requirements of this standard, and all provisions.

The agency conducts administrative investigations, all criminal investigations are conducted by the Pennsylvania State Police. The agency follows a uniform evidence protocol that maximizes the potential for obtaining usable physical evidence for both administrative proceedings and criminal

prosecutions. The protocol is developmentally appropriate for youthful inmates. The facility investigators work hand in hand with the Pennsylvania State Police during the investigations. The State Troopers have also received training in evidence identification and collection.

These protocols are outlined in the above policy, all staff interviewed understood these protocols.

The facility transports all victims to Gettysburg Hospital for forensic examinations, this hospital is equipped with Sexual Assault Nurse Examiners. These examinations are provided at no cost to the victim.

Survivor Inc. will immediately respond. If requested by the victim, the victim advocate, will accompany and support the victim through the forensic medical examination process and investigatory interviews, providing emotional support, crisis intervention, information, and referrals. This was verified through staff interviews and interviews with Survivor Inc.

These above procedures were further confirmed during the interviews with the facility investigators, and during the review of the investigations, all offers of examinations and victim advocacy are documented. The aforementioned victim advocates are available to the victim during the forensic medical examination process, the investigatory interviews and they provide emotional support, crisis intervention, information, and referrals.

If an incident occurred involving a juvenile, they would be transported to the Adams County Children's Center. An examination and advocacy would be provided by the center.

After a careful review of all documentation, and the information received during interviews, I found that the agency is substantially compliant with the requirements of this standard, and all provisions.

EVIDENCE OF COMPLIANCE:

The agency has trained all volunteers and contractors who have contact with inmates on their responsibilities under the agency's sexual abuse and sexual harassment prevention, detection, and response policies and procedures. The level and type of training provided to volunteers and contractors is based on the services they provide and level of contact they have with inmates. At a minimum they are notified of the agency's zero-tolerance policy regarding sexual abuse and sexual harassment and informed how to report such incidents. No volunteers were available during the audit due to the facility lockdown resulting from the Covid 19 pandemic.

The medical contractors receive training through the facility, as well as yearly training through Prime Care Medical. The contracted kitchen staff also receives facility training as well as yearly training on Relias through Trinity Food Services.

The agency maintains all documentation confirming that volunteers and contractors understand the training they have received. This documentation is maintained at the facility, this was confirmed during review of the volunteer and contractor acknowledgment forms.

The agency is far exceeding the expectations of the standard. They are providing yearly training and updates to volunteers and contractors to ensure they are aware of the zero-tolerance policy and PREA.

After a careful review of all documentation, and the information received during the interviews, I found that the agency has substantially exceeded the requirements of this standard, and all provisions. This decision was based on the agency's overall commitment to sexual safety in the facility.

EVIDENCE OF COME	DI IANCE:	

During the intake process inmates receive information explaining the agency's zero tolerance policy regarding sexual abuse and sexual harassment and how to report incidents or suspicions of sexual abuse or sexual harassment, this information is located in the inmate handbook and in a pamphlet form. This was confirmed during the inmate and staff interviews, I further confirmed this by reviewing inmate electronic files and ensuring that the acknowledgment forms were in the files and signed by the inmates.

The facility provides inmate education in formats accessible to all inmates, this includes inmates who are limited English proficient, deaf, visually impaired, or otherwise disabled, as well as to inmates who have limited reading skills. The facility provides materials to inmates in Spanish, they also have

115 33 (4)

designated staff who can provide interpretation of other languages. The Case Mangers confirmed they would provide education to other individuals if needed.

The facility has all key information on the zero-tolerance policy and reporting avenues provided through signage placed throughout the facility. I viewed this signage during the facility tour. I further confirmed that the signage has been in place during the inmate and staff interviews.

Prior to the onsite audit the facility was only providing additional required education to inmates on a voluntary basis. The PREA Coordinator educated every inmate at the facility and provided me with the documentation. The facility has also put into place an education piece where the inmates receive the education while in the intake area through the use of a video. The inmates are acknowledging that they viewed the video.

After a careful review of all documentation, and the information received during interviews, I found that the agency is substantially compliant with the requirements of this standard, and all provisions.

Auditor Overall Compliance Determination

\boxtimes	Exceeds Standard (Substantially exceeds requirement of standards)
	Meets Standard (Substantial compliance; complies in all material ways with the standard for the relevant review period)
	Does Not Meet Standard (Requires Corrective Action)

EVIDENCE OF COMPLIANCE:

All full and part-time medical and mental health care practitioners have been trained on the following:

- How to detect and assess signs of sexual abuse and sexual harassment;
- How to preserve physical evidence of sexual abuse;
- How to respond effectively and professionally to victims of sexual abuse and sexual harassment; and
- How and to whom to report allegations or suspicions of sexual abuse and sexual harassment.

This was confirmed by reviewing the training materials utilized by the facility. I also confirmed this training with the medical and mental health staff during interviews.

The medical staff at the facility does not conduct sexual assault examinations.

The medical and mental health care practitioners also receive the training mandated for employees under § 115.31 or for contractors and volunteers under § 115.32, depending upon the practitioner's status at the agency. This was confirmed during the review of training rosters at the facility. I also confirmed this training with the medical and mental health staff during interviews.

Prime Care Medical is providing this training on a yearly basis to all medical and mental health care practitioners. This practice far exceeds the requirement of the standard.

The medical and mental health staff also receives training through PrimeCare, the facility medical contractor.

Auditor Overall Compliance Determination

	Does Not Meet Standard (Requires Corrective Action)
	Meets Standard (Substantial compliance; complies in all material ways with the standard for the relevant review period)
\boxtimes	Exceeds Standard (Substantially exceeds requirement of standards)

EVIDENCE OF COMPLIANCE:

All inmates are assessed during the intake process, which is completed upon arrival at the facility. This screening is conducted utilizing the screening form in the Offender Management System. This instrument identifies all areas of victimization and abusiveness enumerated in this standard. This was verified through interviews with staff and inmates, as well as review of the completed instruments. The screening is being conducted by trained staff.

The inmates are also screened during the medical intake which takes place upon arrival at the facility. During the medical intake they ask questions on all areas enumerated in the standard, they have the ability to task for a mental health follow up for the inmate.

The initial screening for risk of being sexually abusive considers any known prior acts of sexual abuse, prior convictions for violent offenses, and history of prior institutional violence or sexual abuse. This was confirmed during review of the screening tool and interviews with both staff and inmates.

The facility is reassessing all inmates within 30 days of arrival, this reassessment is being conducted by the classification officer, and they are taking into considerations all information available to them at the time of reassessment. This was confirmed by reviewing the reassessment documentation and staff interviews.

The facility would reassess an inmate's risk level when warranted due to a referral, request, incident of sexual abuse, or receipt of additional information that may change the inmate's risk of sexual victimization or abusiveness. This was confirmed during the staff interviews.

Inmates are informed during the screening process that they will not be disciplined for refusing to answer, or for not disclosing complete information. This was confirmed during review of the screening tools, and during the staff and inmate interviews.

The agency implements control on the dissemination of screening information at the facility level. The information from the screening tools is only available to case managers, medical if needed, and administration. The screening information is stored in the inmate's electronic file.

The agency further screens all inmate through medical, where they again ask questions relative to sexual victimization, this was confirmed by reviewing the medical screening forms and interviews.

The inmates are constantly being reassessed by their assigned Case Managers. The Case Managers meet with each inmate and make case notes in the Offender Management System. This was confirmed through interviews and watching the interaction between inmates and the Case Managers.

The inmates are being screened multiple times during the intake process, this far exceeds the requirements of the standard.

After a careful review of all documentation, and the information received during interviews, I found that the agency substantially exceeds the requirements of this standard, and all provisions.

EVIDENCE OF COMPLIANCE:

The agency utilizes the information from the screening and reassessment to inform housing, bed, work, education, and program assignments with the goal of keeping separate those inmates at high risk of being sexually victimized from those at high risk of being sexually abusive. This was confirmed during review of the policy and I confirmed these procedures during staff and inmate interviews.

The agency makes all of these determinations on an individualized basis, this ensures the safety of each inmate. This was confirmed during policy review, and staff and inmate interviews.

I confirmed during policy review and interviews that when deciding whether to assign a transgender or intersex inmate to a facility for male or female inmates, and in making other housing and programming assignments, the agency considers on a case-by-case basis whether a placement would ensure the inmate's health and safety, and whether the placement would present management or security problems. I also confirmed that the inmates own views would be taken into consideration during these decisions. Through policy and interviews I confirmed that a transgender inmate would be given the opportunity to shower separately from other inmates.

I confirmed during interviews with staff that placement and programming assignments for each transgender or intersex inmate would be reassessed at least twice each year. This is also addressed in policy.

The facility does not place lesbian, gay, bisexual, transgender, or intersex inmates in dedicated facilities, units, or wings solely on the basis of such identification or status. This was confirmed during interviews, as well as inmate interviews, several inmates interviewed at the facility identified as gay, and bisexual.

\boxtimes	Meets Standard (Substantial compliance; complies in all material ways with the standard for the relevant review period)
	Exceeds Standard (Substantially exceeds requirement of standards)

EVIDENCE OF COMPLIANCE:

The facility provides the inmates the information on reporting in the inmate handbook and pamphlet provided at intake and through signage throughout the facility. The inmates can report directly to any staff, through medical, or through the PREA reporting hotline. During the interviews with both staff and inmates I confirmed that they were aware of the reporting avenues.

The agency provides a hotline through the Pennsylvania Department of Corrections for reporting. This is provided in the inmate pamphlets and through signage throughout the facility. The inmates interviewed related that they understood they could remain anonymous.

The staff interviews related that they understood the agency policy that states that staff shall accept reports made verbally, in writing, anonymously, and from third parties and shall promptly document any verbal reports.

The agency provides in policy a method for staff to privately report sexual abuse and sexual harassment of inmates. The policy allows the staff to go outside their immediate chain of command.

The agencies website further instructs third parties on how to report. This was confirmed by viewing the agencies website.

I found during the inmate interviews that the inmates who were interviewed felt that if something was happening, they would feel comfortable telling a staff member at the facility. This confidence in utilizing this reporting avenue shows the overall culture at the facility. Although this statement may not be true for all inmates, the agency has provided so many different reporting avenues that an inmate should feel comfortable with one of them.

EVIDENCE OF COMPLIANCE:

Access to outside confidential support services is outlined in the agencies policies and procedures. The inmate would have the ability to utilize the services provided through Survivor Inc. The information for these services is provided to the inmate during an incident. The services that the inmates would receive are the same as the level received in the community, this was confirmed with Survivor Inc.

Through interviews I further established that follow up mental health care would be provided by the facility for any inmate victim or abuser who was involved in an incident.

The PREA Coordinator would inform inmates, prior to giving them access, of the extent to which such communications will be monitored and the extent to which reports of abuse will be forwarded to authorities in accordance with mandatory reporting laws. This was confirmed during interviews.

The facility has provided the contact information for Survivor Inc. to inmates involved in incidents, it is unknown if they contacted the agency due to confidentiality. This was confirmed through interviews.

The agencies website outlines the third party reporting avenues, this was confirmed through review of the agency website. The website has the following posted:

The Adams County Adult Correctional Complex (ACACC) maintains a zero tolerance policy regarding institutional sexual harassment, assault or abuse. Policy and procedures to address issues of this nature have been developed and implemented in accordance with the Federal Prison Rape Elimination Act (PREA) Standards.

Employees and inmates' families may report incidents via email to Jorge Alvarez (jalvarez@adamscounty.us).

or by mail to:

EVIDENCE OF COMPLIANCE:

The policy states all ACACC staff members, contractor, medical provider, mental health practitioners, volunteer, official visitor, or other agency representatives shall immediately report any knowledge, suspicion, and/or information regarding an incident of sexual abuse and/or sexual harassment occurring in the facility. The staff interviewed understood their responsibilities under this policy. During interviews with staff who reported an allegation I verified that they followed the policy.

The information concerning a complaint of alleged sexual misconduct is confidential and may only be available to individuals who have an established role in the reporting, processing, investigating, and resolving the alleged sexual misconduct and immediate and continued care of the victim. All staff interviewed understood this requirement.

During the interviews of medical and mental health staff I confirmed their duty to report, they understood their obligations to report an incident to security staff. They utilize a limits of confidentiality form that is signed by the inmate.

All allegations are being reported to the facility PREA Coordinator. This was confirmed during staff interviews and review of the investigations.

More importantly during the review of agency investigations, and staff interviews I found they understand the provisions of the standard and are applying them throughout their investigations. The Investigators have received training on how to conduct the investigations at the facility level. They work closely with the administration during any investigation. The Pennsylvania State Police conduct any criminal investigation, they are highly trained sworn law enforcement officers. After reviewing investigations, I was impressed with the consistency of the overall investigation process. During interviews and the review of the investigation reports I found that all substantiated allegations that violated criminal law would be sent for a prosecutorial decision. The PREA Coordinator confirmed that he stays in contact with the Pennsylvania State Police through either email or by telephone during an investigation. After a careful review of all documentation, and the information received during interviews, I found that the agency substantially exceeds the requirements of this standard, and all provisions. Auditor Overall Compliance Determination

	Exceeds Standard (Substantially exceeds requirement of standards)
\boxtimes	Meets Standard (Substantial compliance; complies in all material ways with the standard for the relevant review period)
	Does Not Meet Standard (Requires Corrective Action)

EVIDENCE OF COMPLIANCE:

The agency has a policy in place that addresses the provisions of this standard. I found that the agency digitally retains all data collected, this data is available to the public through the website.

The annual reports are published on the website. All personal identifiers have been removed from the reports.

The agency has a policy in place that maintains all sexual abuse data for at least 10 years from the date received.

Staff interviews and review of the annual reports further confirmed this procedure.

After a careful review of all documentation, and the information received during both the agency level and the facility level interviews, I found that the agency is substantially compliant with the requirements of this standard, and all provisions.
